Kerbourgnec enclosure and alignments

The main megalithic site on the Presqu'île, the 3rd largest in Morbihan, is Kerbourgnec in Saint Pierre Quiberon. It consists of an alignment of 25 menhirs in 5 rows, some with surprising shapes. It is extended by a cromlec'h of 27 other menhirs placed in a circle. Rarer, well-preserved dolmens…

The Kerzerho Giants

These stones are around 6m high and weigh around 40 tonnes! They are aligned perpendicular to the Alignements de Kerzehro: from north to south. The Grand menhir foudroyé was struck by lightning in 1947. As for the one lying on its side, it's the Table des Sacrifices (Sacrifice Table): its…

Dolmen de Port-Blanc

The dolmens of Port-Blanc, or Porz-Guen, located in Saint-Pierre-Quiberon, are two corridor dolmens built on the edge of a cliff near the Pointe du Percho. Excavated in 1883 by Félix Gaillard, restored in 1884 and classified as historic monuments in 1889, they revealed collective burials and a…

Alignements du Petit Ménec

The Petit Ménec alignments comprise 101 menhirs, divided into 7 rows heading east. They are the continuation of the neighbouring alignments, which start at Erdeven and join the river at Crac'h, passing through the Carnac alignments (Ménec, Kermario and Kerlescan). A site to discover on an…

Manio Giant

A stroll through the undergrowth where the 6.5 m high giant of Le Manio and the quadrilateral of menhirs are hidden. It's said that if you can throw a stone at the top, you'll get your wish.

Caesar's Chair

Lost in the woods is an isolated group of menhirs, one of which is very large and shaped like a seat. Known as Caesar's Chair, it alludes to the occupation of the commune by Roman armies, even though Caesar himself never came here!

Kerjean menhirs

It's only been a short time (barely 10 years) since this field was cleared by volunteers. No scientific research has been carried out. We don't know how many menhirs there might originally have been. We can see that some of them were incorporated into the low wall delimiting the field, which was to…

Kornevec alignment

Located in the heart of the Forêt de Floranges, this alignment has been badly damaged, especially since the hurricane of 1987. It consists of a single row of menhirs oriented EEN-OOS. Only two standing menhirs remain, all the others having been deliberately cut off at their base (Christianization…

Neolithic stele

Very fine Neolithic stele, reused, arranged as a "table" and fitted onto a Gallic stele. This mortise-and-tenon fitting has mutilated the interior of this stele. The decoration is still clearly visible, and consists of a cartouche of a goddess in the form of a shield with a summit appendage.

Dolmen du Runesto

On the edge of a cultivated field and at a high point in the landscape, stands the Runesto dolmen. This large dolmen is set within a large mound, into which it would have been inserted after the latter's erection. Of this corridor dolmen, only the chamber is still accessible via a staircase, which…
